EDITORIAL

Welcome to the Respiratory Review for July 2015 to June 2016. The ACPRC would like to thank reviewers for their ongoing commitment to this publication.

Cardiovascular Disease

Cardiac Rehabilitation

AAMOT, L., KARLSEN, T., DALEN, H. & STOYLEN, A. 2015
Long-term Exercise Adherence After High-intensity Interval Training in Cardiac Rehabilitation: A Randomized Study. 
*Physiotherapy Research International*, 21(1), 54-64.
Abstract

A secondary meta-synthesis of qualitative studies of gender and access to cardiac rehabilitation. 
*Journal of advanced nursing*, 71(8), 1758-1773.
Abstract

Cardiac rehabilitation patients' perspectives on the recovery following heart valve surgery: a narrative analysis. 
*Journal of advanced nursing*, 72(5), 1097-1108.
Abstract

Knowledge and exercise behavior maintenance in cardiac rehabilitation patients receiving educational interventions. 
*Heart and Lung*, 44(6), 474–480.
Abstract

Heart Failure

CHEN, C., STEVENSON, L., STEWART, G. et al. 2015.
Real world effectiveness of primary implantable cardioverter defibrillators implanted during hospital admissions for exacerbation of heart failure or other acute co-morbidities: cohort study of older patients with heart failure. 
*British Medical Journal*, 351, h3529.
Abstract

Abstract

Effects of exercise on C-reactive protein in healthy patients and in patients with heart disease: A meta-analysis. 
Abstract

Effects of aerobic interval training on measures of anxiety, depression and quality of life in patients with ischaemic heart failure and an implantable cardioverter defibrillator: A prospective non-randomized trial. 
*Journal of rehabilitation medicine*, 48(3), 300-306.
Abstract

Increased Dead Space Ventilation Mediates Reduced Exercise Capacity in Systolic Heart Failure. 
Abstract

Submissive hypercapnia: Why COPD patients are more prone to CO2 retention than heart failure patients. 
*Respiratory Physiology & Neurobiology*, 216, 86-93.
Abstract

Abstract

Abstract

Abstract

**Critical Care**

**Acute Lung Injury and ARDS**

Abstract

Abstract

Abstract

Abstract

Abstract

Abstract

Abstract

Abstract

Abstract

Airway and Anaesthesia

NIChOL, G., LEROUX, B., WANG, H. et al. 2015.
Trial of Continuous or Interrupted Chest Compressions during CPR
Abstract

PLUJMS, W., VAN MOOK, W., WITTEKAMP, B. & BERGMANS, D. 2015.
Postextubation laryngeal edema and stridor resulting in respiratory failure in critically ill adult patients: updated review.
*Critical Care*, 19, 295.
Abstract

WALKER, P., BUEHNER, M., WOOD, L. et al. 2015.
Diagnosis and management of inhalation injury: an updated review.
*Critical Care*, 19, 351.
Abstract

**Critical Care Rehabilitation**

BAKHRU, R., WIEBE, D., McWILLIAMS, D. et al. 2015.
An Environmental Scan for Early Mobilization Practices in U.S. ICUs.
*Critical Care Medicine*, 43(11), 2360-2369.
Abstract

Prospective observation of physical activity in critically ill patients who were intubated for more than 48 hours.
*Journal of Critical Care*, 30(4), 658-663.
Abstract

BORGES, R., CARVALHO, C., COLOBO, A. et al. 2015.
Physical activity, muscle strength, and exercise capacity 3 months after severe sepsis and septic shock.
*Intensive Care Medicine*, 42(8), 1433-1444.
Abstract

CAMERON, S., BALL, I., CEPINSKAS, G. et al. 2015.
Early mobilization in the critical care unit: A review of adult and pediatric literature
*Journal of Critical Care*, 30(4), 664-672.
Abstract

Beyond muscle destruction: a systematic review of rhabdomyolysis for clinical practice.
*Critical Care*, 20,135.
Abstract

Implementing and sustaining an early rehabilitation program in a medical intensive care unit: A qualitative analysis.
*Journal of Critical Care*, 30(4), 698-704.
Abstract

*Critical Care*, 20, 30.
Abstract

FREEMAN-SANDERSON, A., TOGHER, L., ELKINS, M. & PHIPPS, P.
Quality of life improves with return of voice in tracheostomy patients in intensive care: An observational study.
*Journal of Critical Care*, 33, 186-191.
Abstract

Early mobilisation in intensive care units in Australia and Scotland: a prospective, observational cohort study examining mobilisation practises and barriers
*Critical Care*, 19, 336.
Abstract
HODGSON, C., BAILEY, M., BELLOMO, R. et al. 2016. The Trial of Early Activity and Mobilization Study Investigators. A Binational Multicenter Pilot Feasibility Randomized Controlled Trial of Early Goal-Directed Mobilization in the ICU. Critical Care Medicine, 44(6), 1145-1152. Abstract

JIROUTKOVA., K., KRAJCOVA, A., ZIAK, J. et al. 2015. Mitochondrial function in skeletal muscle of patients with protracted critical illness and ICU-acquired weakness. Critical Care, 19, 448. Abstract

PANDULLO, S., SPILMAN, S., SMITH, J. et al. 2015. Time for critically ill patients to regain mobility after early mobilization in the intensive care unit and transition to a general inpatient floor. Journal of Critical Care, 30(6), 1238-1242. Abstract

VERCELES, A. & HAGER, E. 2015, Use of Accelerometry to Monitor Physical Activity in Critically Ill Subjects: A Systematic Review. Respiratory Care, 60(9), 1330-1336. Abstract
